Fund Objective and Strategy

The investment objective of the Fund is to seek to maximise total returns over the long term, defined as five to ten years. The Fund will invest mainly in a portfolio of UK equities listed on the LSE or quoted on AIM/ISDX, with an emphasis on small and mid-capitalised companies. It may also invest in other transferable securities, money market instruments, units and/or shares in other collective investment schemes, deposits, warrants, cash and near cash. The manager will follow the methodology of Business Perspective Investing and it is expected that the portfolio will contain between 25 and 40 holdings when fully invested.

Fund Commentary

August saw a 3.23% increase in both the Fund's Income (H) Class share price from 189.66p to 195.78p and the Accumulation (G) Class share price from 192.18p to 198.38p. This was achieved against a rise of 1.98% for the UK stock market as a whole and 3.23% for the IA UK All Companies sector. Net inflows remained strong at £10.1m over the month and with £6.6m net investment, cash levels rose from 16.1% to 17.2% of the portfolio's net asset value.

August was typically quiet with only a handful of holdings reporting results or providing trading updates. We had 20 gainers of which five were double-digit: Dotdigital (+17.4%), YouGov (+14.4%), Kainos (+14.4%), Mortgage Advice Bureau (+11.6%), and XP Power (+11.0%). XP Power's interim results revealed record order intake and revenue up 23% on a constant currency basis. Growth has been driven by continued strength in the Semiconductor Manufacturing Equipment sector and a recovery in Industrial Technology which have offset the normalisation in Healthcare after exceptional Covid-19 related orders in 2020. The excellent performance has been achieved despite price and availability pressures within the component supply chain, which XP has managed adeptly thus far. There was also some positive news from London Stock Exchange Group (+8.0%) who announced that its Refinitiv cost synergy programme was ahead of schedule. Leverage was also reduced following the divestment of Borsa Italiana. The Capital Markets division saw the largest number of new equity issues in H1 since 2014 and the interim dividend was increased by 7%.

The biggest detractor to performance was Avon Protection (-30.6%) on the back of a nasty profit warning. Delays in the receipt of orders, supply chain disruption and a tight US labour market all contributed to a reduction in revenue guidance for FY21 and FY22. This revenue shortfall, coupled with a high fixed cost base, has resulted in significant reductions to earnings forecasts. Avon has maintained current guidance for FY23, and we have retained our holding. However, the shares may remain friendless until the company proves it is coming out the other side. We don't expect Avon to be the last company to warn on supply chain and labour market challenges in the months ahead.
