

# CFP Castlefield B.E.S.T Sustainable Portfolio Income Fund

## Factsheet - September 2021

### Fund Objective and Strategy

The investment objective of the Fund is to focus on providing income, with a minimum income return of 3% per annum, and also to provide capital growth consistent with this primary objective over the long term. Long term means over a minimum investment horizon of five years.

The Investment Adviser expects to invest more than 50% of the Fund in collective investment schemes with exposure to both UK and non-UK equities and fixed income securities. The Fund may also invest in transferable securities, such as shares and bonds (both quoted and unquoted), money market instruments, deposits, warrants, cash and near cash.

In seeking to achieve the stated investment objective, the Investment Adviser uses a responsible investment research process to identify the universe of securities from which the Fund may invest. The four criteria that need to be evidenced by each investment are reflected in the name of the Fund where "B.E.S.T" indicates Business & financial, Environmental & ecological, Social and Transparency & governance, however equal weighting may not be given to each element of these criteria when screening potential investments. The Investment Adviser then supplements this research process by selecting only those investments which, by their nature, are considered to be sustainable in order to meet the investment objective. Sustainable activities are considered to be those necessary to ensure the long term continuity of an activity, system, society or enterprise. Further information on the "B.E.S.T" criteria and the sustainability element may be obtained from the Investment Adviser upon request.

The Fund may invest in shares or units of collective investment schemes which are managed or operated by the ACD or an associate of the ACD. When investing in collective investment schemes, some of the underlying investments of that collective investment scheme may not meet all four elements of the "B.E.S.T" criteria. The Fund may also use derivatives and forward transactions for investment purposes or efficient portfolio management (including hedging). The use of derivatives for these purposes is expected to be limited however it may affect the volatility or risk profile of the Fund although this is not the ACD's intention.
