Chelmsford, Essex CM2 5PW

COMPANY INFORMATION

Castlefield Funds is an Investment Company with Variable Capital under regulation 12 of the Open-Ended Investment Company Regulations and incorporated in England and Wales under registered number IC000234 and authorised by the Financial Conduct Authority with effect from 14 May 2003. Shareholders are not liable for the debts of the Company. At the period end, the Company contained six sub-Funds. The report and accounts contained within the below statements refer specifically to Castlefield B.E.S.T Income, Castlefield Managed Multi-Asset, Castlefield UK Opportunities and Castlefield UK Smaller Companies as sub-Funds of the Company.

The Company is a UCITS scheme which complies with the Financial Conduct Authority Collective Investment Schemes sourcebook and is structured as an umbrella Company so that different sub-Funds may be established from time to time by the ACD with the approval of the Financial Conduct Authority and the agreement of the Depositary.

REPORT OF THE ACD TO THE SHAREHOLDERS OF THE COMPANY

The ACD, as sole director, presents its report and the audited Financial Statements of the Company for the period from 1st March 2017 to 31 August 2017.

The Investment Objectives and Policies of each sub-Fund of the Company are covered in the section for each sub-Fund. The sub-Funds of an umbrella Company should be invested as if they were a single company. The names and addresses of the ACD, the Depositary, the Registrar, the Investment Adviser and the Auditor are detailed on page 2.

In the future there may be other sub-Funds of the company.

Where a sub-Fund invests in other Collective Investment Schemes, the maximum annual management fee that may be charged to that Collective Investment Scheme is 5% of the net asset value of such a scheme, however, it is expected that the actual annual management fee will not exceed 2%.

SUB-FUND CROSS-HOLDINGS

No sub-Fund held shares in any other sub-Fund within the Investment Company with Variable Capital during the current or prior year.

MANAGEMENT AND ADMINISTRATION

DIRECTORS' STATEMENT

In accordance with the Regulations, we hereby certify the report on behalf of the directors of Castlefield Fund Partners Limited.

John Eckersley
Managing Director (of the ACD)

Summaya Mosam
Director (of the ACD)

ABOUT THE INVESTMENT ADVISER

Castlefield Investment Partners (CIP) is part of the Castlefield family of investment, advisory and operational support businesses. The group adopts a unique approach to looking after money, reflecting the individual objectives of all kinds of clients – from private individuals and the businesses they own and work for, to the not-for-profit organisations they help to run. CIP is authorised and regulated by the Financial Conduct Authority and is a member of the London Stock Exchange.

INVESTMENT REVIEW OF CASTLEFIELD FUNDS

MARKET REVIEW

The first half of the year was dominated by Theresa May's hastily called general election. The news was immediately followed by a fall in the UK stock market and sterling strengthened for a brief spell, but this was short-lived and equities soon recovered their losses. The Prime Minister decided to roll the dice, despite well documented voter fatigue and the Fixed Term Parliament Act existing to prevent just this kind of snap election being launched. The gamble, of course, did not pay off for Mrs May and she was left with a minority government. The morning after the election, UK share movements echoed those seen after the referendum almost a year previously, with domestic-focused companies weaker and the large multinational businesses with overseas currency exposure faring significantly better.

Inflation has continued to rise due to the weaker pound, directly influenced by the decision to vote for "Brexit" in last years' referendum. The average worker will inevitably be worse off than a year ago due to rises in wages not keeping up with inflation. Whilst this has pressured disposable income over the past year, denting sentiment towards UK market sectors such as retailers, there has been some signs of emerging improvement for domestic consumer stocks.

Europe saw a sweeping victory for new French President Emmanuel Macron against the French National Front. Despite the far-right being beaten back in this particular election, Europe is still dogged by the populist rhetoric and anti-immigrant sentiment that has dominated political discord across the continent. This was evidenced most recently in the German election which saw Angela Merkel's position weakened and the far-right Alternative for Deutschland (AfD) party ride into prominence. Elsewhere, discussion over the Catalan independence referendum put the cat among the pigeons in Spain. Speculation over whether or not it would go ahead came to fruition recently but debate over the legality of the move still rages.

Across the Atlantic, June saw a high-profile announcement as President Trump confirmed the rumours that he intended to withdraw the US from the 2015 Paris Climate Agreement. The Paris Agreement was a triumph of global political will to tackle a critical issue that affects not only society and the environment as a whole but also financial markets. The agreement has been key to encouraging investors to question the valuation basis for the world's largest oil companies and to consider the need to mitigate against the potential for increased incidence of natural disasters. Although dispiriting to hear, more heartening was the number of Chief Executives of American companies and Mayors of US cities that reaffirmed their intention to meet their pledges under the Agreement. The President's words are impotent in the face of such actions.

Impotence seems to be a recurring theme for the Trump presidency. His inability to pass proposed healthcare reforms despite the Republicans controlling all branches of the government has cast doubts on whether Trump's other planned policy changes will go ahead. August saw Trump announce plans to cut corporation tax to 15% from the current rate of 35%. This saw the resumption of the "reflation trade" that was first triggered by his election. However, there is only a small margin of error for Trump to see his reforms realised. If a few Republicans in both the Senate and the House of Representatives decide that the proposed tax policy is unsuitable then it cannot be passed without Democratic votes, which Trump is unlikely to receive. US equities have consequently responded in cautiously optimistic fashion, moving higher anticipating more favourable tax rates but mindful of the policy deadlock that has characterised much of the first year of the Trump Presidency.

Governance in a corporate sense has been the key talking point with the release of the third Castlefield Stewardship Report. Castlefield promotes open dialogue with investee companies which we see as an important part of being Thoughtful Investors. In practical terms, this can mean avoiding those companies where poor corporate behaviour can result in subsequent regulatory fines or civil lawsuits. It can also mean taking account of a broader consideration of environmental risk when making investment decisions. The importance of this factor was thrown into sharp focus with the devastation caused by several hurricanes over the last quarter. Changing weather patterns as a consequence of climate change highlight that companies providing solutions to the problems of global warming and abating emissions are well positioned to mitigate climate related natural disasters and deliver long term value.

OUTLOOK

The UK election result has resulted in a constrained mandate for the Prime Minister, which has led to an erosion of confidence within her abilities to lead on Brexit discussions. It is still unclear whether a measured, consensual approach to Brexit talks will be taken (commonly known as a "soft Brexit") or whether "no deal is better than a bad deal" will be the tone that steers the negotiations.

The Bank of England is tasked with keeping inflation at 2% and Mark Carney's recent comments indicate a normalising of interest rates from their post-Brexit record low of 0.25%, although no official decision has yet been made. Should the BoE press ahead with tightening rates however, this nascent recovery may be halted in its tracks. The effect of a rate rise will have far reaching consequences for everyone from pensioners, to workers to businesses although not all of which need be negative. Indeed, pensioners are set to see a benefit of increased inflation. The triple lock pension system means that pensioners, and some of those currently saving into private pensions, will see significant benefits. Under the triple lock guarantee, pensions rise by either 2.5%, earnings or prices, whichever is the higher. With inflation being the highest, pensions will be up-rated by 3% in April next year.

* Operating charges, otherwise known as OCF is the ratio of the sub-Fund's total disclosable costs (excluding overdraft interest) to the average net assets of the sub-Fund. The OCF is intended to provide a reliable figure which gives the most accurate measure of what it costs to invest in a sub-Fund and is calculated based on the last period's figures.

** Direct transaction costs are stated after deducting the proportion of the amounts collected from dilution adjustments or dilution levies that relate to direct transaction costs. A negative transaction costs figure might arise where there is a timing difference between inflows and the settlement of the resultant purchases.

CASTLEFIELD B.E.S.T INCOME FUND

RISK AND REWARD INDICATOR (RRI)

The sub-Fund is ranked as 5 because it has experienced medium to high rises and falls in value over the past five years. Please note that even the lowest ranking does not mean a risk-free investment.

The Risk and Reward Indicator demonstrates where the sub-Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the sub-Fund.

INVESTMENT OBJECTIVE AND POLICY

The investment objective of the Castlefield B.E.S.T Income Fund is to predominantly generate a relatively high level of current income, together with income growth and some capital growth over the long term. The investment policy of the sub-Fund is to invest principally in a portfolio of UK equities, although money market instruments, collective investment schemes, deposits, warrants, derivatives (for hedging purposes) and other permitted investments and transactions may also be invested in.

In seeking to achieve the stated investment objective, consideration will be given not only to traditional business and financial criteria, but also to environmental, ethical, social, governance and other similar issues. This is reflected in the name of the Fund where "B.E.S.T" is intended to indicate the investment criteria that will be applied to the Fund: Business, Environmental/ethical, Social/governance; and Transparency.

INVESTMENT REVIEW

PERFORMANCE

During the period, the fund achieved a return of +5.00% (Institutional Income Units) against its peer group IA UK Equity Income sector, which returned +4.93%.

MARKET REVIEW

The reporting period saw significant inflows into the Fund allowing for purchases of new holdings and additions to existing holdings alike. We took the opportunity to increase our position in Debenhams. Whilst, General Retailers as a whole experienced a tough period with consumer confidence remaining fragile and pressure on the growth of consumers' "real" disposable incomes, we viewed concerns with Debenhams to be overdone as management continue to restructure the store portfolio to meet the changes in consumer shopping habits. The group is on track with reducing debt and continues to develop, refine and grow the internet retailing channel, so we took advantage of recent weakness to add to the holding. Premier Technical Service Group (PTSG) has moved from strength to strength over the year as the company continues to identify attractive and accretive acquisitions and with plenty of further opportunities presenting themselves. In July, we took part in a placing by PTSG to fund the acquisition of a market leading lightning protection and steeplejack company. August then revealed this incremental top-up to be a timely move as our optimism was confirmed towards the end of the month as interim results revealed strong performance and gave a 30% boost to the share price. A further addition to the Fund came via the €270m initial public offering on the London AIM market of a renewable energy infrastructure company, Greencoat Renewables. Proceeds from the listing will be used to fund a portfolio of onshore wind farms in Ireland. The final new holding added to the Fund was in premium building products provider, Alumasc Group. Alumasc has built strong positions, and leading brands, in a number of niche markets, particularly those which add value in conserving and managing the scarce resources of energy and water in the built environment. The shares offer an attractive initial yield whilst, given the specialism in sustainable building products, it's business activities, importantly, screen well against our B.E.S.T remit. Turning to disposals, we came to the decision to exit our position in Glanbia. Having been holders of the food producer since 2014 we have been able to enjoy its price appreciation from initial investment until our exit.

OUTLOOK

With the consumer price index (CPI) rising to 3% shortly after the period end, inflation now stands at the highest level since 2012. As unemployment rates are now at their lowest since records began in 1975, the Bank of England's past justifications for keeping rates at their historic lows now appear untenable. With market participants increasingly expecting a rate hike before the year-end, we are likely to see a further increase in the pound relative to the dollar should this come to fruition. The fund's diversified nature should help to mitigate any fluctuations from currency moves however with uncertain macroeconomic conditions further heightened by the noise of Brexit, we remain alive to such factors. We do not allow these to guide investment decisions though, preferring to base our investment decisions on company fundamentals. A strong focus on robust balance sheets, healthy cash flows and sustainable and growing dividends whilst also importantly, ensuring all holdings meet our B.E.S.T remit are central to our approach

CASTLEFIELD B.E.S.T INCOME FUND

NOTES TO THE FINANCIAL STATEMENTS

1. ACCOUNTING POLICIES

The interim financial statements have been prepared under the historical cost convention, as modified by the revaluation of investments and in accordance with the Statement of Recommended Practice "Financial Statements of Authorised Funds", issued by The Investment Association in May 2014, the Financial Conduct Authority's Collective Investment Schemes Sourcebook and the Instrument of Incorporation.

DISTRIBUTION TABLES

For the period from 1 March 2017 to 31 May 2017:

First Interim dividend distribution in pence per share.

General Shares - Income

	Net income	Equalisation	Distribution Paid	
			25/08/17	27/08/16
Group 1	0.6997	-	0.6997	0.8011
Group 2	0.6811	0.0186	0.6997	0.8011

Institutional Shares - Income

	Net income	Equalisation	Distribution Paid	
			25/08/17	27/08/16
Group 1	0.7190	-	0.7190	0.8210
Group 2	0.4339	0.2851	0.7190	0.8210

Charity Shares - Income

	Net income	Equalisation	Distribution Paid	
			25/08/17	27/08/16

* Operating charges, otherwise known as OCF is the ratio of the sub-Fund's total disclosable costs (excluding overdraft interest) to the average net assets of the sub-Fund. The OCF is intended to provide a reliable figure which gives the most accurate measure of what it costs to invest in a sub-Fund and is calculated based on the last period's figures.

** Direct transaction costs are stated after deducting the proportion of the amounts collected from dilution adjustments or dilution levies that relate to direct transaction costs. A negative transaction costs figure might arise where there is a timing difference between inflows and the settlement of the resultant purchases.

CASTLEFIELD MANAGED MULTI-ASSET FUND

RISK AND REWARD INDICATOR (RRI)

The sub-Fund is ranked as 3 because the sub-Fund and Portfolios holding similar assets have experienced low to medium rises and falls in value over the past five years. Please note that even the lowest ranking does not mean a risk-free investment.

The Risk and Reward Indicator demonstrates where the sub-Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the sub-Fund.

INVESTMENT OBJECTIVE AND POLICY

The investment objective of the Castlefield Managed Multi-Asset Fund is to generate a positive annualised return over a rolling 3 year basis. However, there is no guarantee that this objective will be achieved over that specific, or any, time period and there is always a risk of loss to your original capital. The sub-Fund will invest in transferable securities (both quoted and unquoted), units and/or shares in other collective investment schemes, structured products, deposits, warrants, fixed interest securities, money market instruments, and cash and near cash. The sub-Fund may also invest in derivatives and forward transactions for investment purposes as well as for efficient portfolio management (including hedging), and may also borrow and enter into stocklending and underwriting arrangements in accordance with COLL.

INVESTMENT REVIEW

PERFORMANCE

The fund returned 2.57% (as measured by the Institutional Income class), compared to an increase in UK CPI inflation during the 6 months under review of 1.08% and an average return from the peer group of funds within the IA Targeted Absolute Return Sector of 2.05%.

MARKET REVIEW

During the six months under review, equity markets generated relatively modest gains as bouts of volatility affected risk assets globally. On the domestic front, the announcement of a snap general election in the UK saw shares move lower as investors switched to bonds before subsequently reverting to trend after the election itself. A reduced majority with no overall control for the government was perceived to be riskier for gilt investors but conversely better for equities with the government being forced to engage to a greater extent with those holding a more moderate view of what a "Brexit" should look like. Currencies were the other main asset class to be influenced by such moves during the period with sterling beginning to reverse some of the losses against the dollar returned since the Brexit referendum. A full twelve-month period since the referendum result in June 2016 is now behind us and a weaker currency over that time-frame has seen UK inflation pick up materially, moving ahead of the Bank of England's target of 2%. Recent comments from the Bank have hinted heavily at a rate rise in the remainder of the year and sterling has consequently appreciated against the dollar by just under 5% during the period under review.

PORTFOLIO ACTIVITY

Within the portfolio, the relatively buoyant market backdrop over the past several years meant that we received the proceeds from a number of structured products which were redeeming in the period. We worked to reinvest into some similarly attractive issues, again using some of the same strategies that have worked well for us in the past such as "defensive autocalls" alongside some newer strategies.

With the "Autocall" notes, we selected replacement holdings with a defensive return profile, typically incorporating either a declining hurdle for achieving returns or a deeply discounted final barrier, providing much greater certainty over the receipt of the final proceeds at the end of the term. This provides an attractive risk-reward profile in conjunction with the coupons on offer. The strong run of underlying equity markets has influenced our thinking here. Whilst equity markets continue to make advances we have also observed that returns have moderated over the past year and introducing more defensive holdings in this area should mitigate against any unforeseen negative developments.

We dealt with the prospect of rising yields in the domestic fixed income market by acquiring some new bonds at the point of primary issuance, providing the potential for more attractive returns as well as some cushion should yields materially pick up. These issues came to market from very conservatively structured borrowers with low levels of overall borrowings and although each issue was unsecured, the issuing organisations have good fixed asset cover on their respective balance sheets.

The remainder of net inflows was invested into infrastructure and real estate holdings where the investments represent additions to existing holdings or related funds. The Pacific Industrial and Logistics REIT focuses on light industrial units across the UK and has been a beneficiary of the boom in internet retailing and associated logistics. We first invested in late 2016 as part of a capital raising to fund an acquisition of a property portfolio that they were completing and then took part in a similar placing this August. We also added a new fund from Greencoat to the portfolio. Greencoat manage portfolios of renewable energy assets and their focus on distributing cash flows to investors leads to a disciplined process. We already hold one fund managed by Greencoat and we have invested in their most recent offering which is an AIM listed operating company focusing on Irish wind farm assets.

CASTLEFIELD MANAGED MULTI-ASSET FUND

OUTLOOK

With the BoE having hinted strongly that UK base-rates will likely rise in the near term but the number of MPC meetings remaining before the end of the year rapidly diminishing, we still expect an increase to be announced at either the November or December meetings. Whilst this will only have the effect of reversing the emergency 0.25% cut enacted shortly after the Brexit referendum in August 2016, recent moves of sterling against the dollar suggests that there may be a further rebound of sterling to come through. Whilst we remain cautiously optimistic, our portfolio positioning has taken this view into account with more defensive structured product and bond positioning being implemented over the past six months.

* Operating charges, otherwise known as OCF is the ratio of the sub-Fund's total disclosable costs (excluding overdraft interest) to the average net assets of the sub-Fund. The OCF is intended to provide a reliable figure which gives the most accurate measure of what it costs to invest in a sub-Fund and is calculated based on the last period's figures.

** Direct transaction costs are stated after deducting the proportion of the amounts collected from dilution adjustments or dilution levies that relate to direct transaction costs. A negative transaction costs figure might arise where there is a timing difference between inflows and the settlement of the resultant purchases.

CASTLEFIELD UK OPPORTUNITIES FUND

RISK AND REWARD INDICATOR (RRI)

The sub-Fund is ranked as 6 because it has experienced relatively high rises and falls in value over the past five years. Please note that even the lowest ranking does not mean a risk-free investment.

The Risk and Reward Indicator demonstrates where the sub-Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the sub-Fund.

INVESTMENT OBJECTIVE AND POLICY

The investment objective of the Castlefield UK Opportunities Fund is to invest primarily for long term capital growth from a portfolio of investments. The investment policy of the sub-Fund is to actively invest in those companies, primarily within the UK, where the Manager believes there are above average opportunities for growth.

INVESTMENT REVIEW

PERFORMANCE

The fund returned 4.23% (as measured by the Institutional Income class), compared to an average return from the peer group of funds within the IA UK All Companies Sector of 5.92%.

MARKET REVIEW

With the market enjoying a buoyant start to the year, Theresa May called a snap general election in April prompting a sharp reversal in UK equities. After the initial sell-off a swift rebound followed driven by more domestic-focused stocks. The pound regained some of the ground lost to other currencies after the election result confirmed that the government had a weakened majority and equity investors considered the prospect of a more business-friendly outcome to the Brexit negotiations. As the period progressed, there was a rebound for more cyclical sectors despite the wider geopolitical uncertainty as a result of the actions of North Korea. However, with sterling continuing to rise on the back of comments from the BoE that it would begin tightening rates, some stocks with a high proportion of overseas earnings or assets again started to slip. Disposable incomes were squeezed during the period as rising inflation, prompted by the sharp fall of sterling after the Brexit referendum just over a year ago.

PORTFOLIO ACTIVITY

During the period, we have taken some profits in a number of holdings that had performed particularly well, often bucking the wider trends within their respective sectors. In the Leisure sector, often seen as an industry that performs in a similar manner to the retailers, we sold some of our shares in the cinema-chain Cineworld and hotel operator Park Plaza Europe, reducing our holdings in each but retaining a sizeable stake. Cineworld continues to gradually expand its portfolio of cinemas in this country but has a greater capacity to expand its estate of multiplexes across eastern Europe where it also has operations. Park Plaza also performed very strongly as a direct result of portfolio expansion. It has a rolling programme of redevelopments predominantly across its London-based hotels and also new openings across continental Europe. Hotels are concentrated in destination cities aimed at the business or mid-market leisure customer. It has a Croatian holiday business which it has consolidated during the period that has seen good levels of trading despite being something of an "outlier" to the rest of its hotel portfolio. The weakness of sterling during the period has benefited the company two-fold, prompting an increase in the value of its overseas assets once converted back in to a sterling-denominated "net asset value" and also making the UK a more attractive holiday destination to overseas travellers. Revenue per room in the London hotels was therefore up over 10% on stronger pricing as a result. With a further raft of extensions and redevelopments planned and underway, the company is still a key holding and we have simply taken some profits following a sharp appreciation in the share price.

We added a holding of K3 Capital to the portfolio towards the start of the period when the group listed on the AIM market in April. We followed this up with a further purchase after the period end following a further placing of shares. The Bolton-headquartered group provides business-listing and vending services, typically acting on sales of up to £50m. The trends outlined in the maiden results announcement released in early September pointed to a continuation of the positive trading apparent at the IPO. Key operating metrics tracked by the company such as initial enquires and numbers of mandates awarded all point to a further expansion of market share. Winning larger mandates also directly increases profitability and the group's billing structure results in excellent cash generation resulting in a full-year forecast dividend yield of over 6%.

OUTLOOK

We have, as noted above, taken profits in some stocks as a risk-control measure following a strong run in several key holdings. This has led us to be increasingly vigilant of headwinds to equities following this otherwise positive run. The recent much publicised increase in inflation is making headlines but is not necessarily a negative for equities. Stable, moderately positive inflation is no hindrance to growing corporate earnings, unlike deflation or excessive inflation which can both be disastrous.

CASTLEFIELD UK OPPORTUNITIES FUND

Whilst CPI at 3% might feel like “excessive inflation” In the current low return environment, it is not very high in an historical context. We therefore await the reaction of the Bank of England mindful that a greater risk to equities is an increase to interest rates being pursued at a pace that economic growth cannot bear. A gradual exit of extraordinarily low rates is more than overdue but we would argue for a measured reaction to the current inflation figures.

CASTLEFIELD UK SMALLER COMPANIES FUND

RISK AND REWARD INDICATOR (RRI)

The sub-Fund is ranked as 5 because it has experienced medium to high rises and falls in value over the past five years. Please note that even the lowest ranking does not mean a risk-free investment.

The Risk and Reward Indicator demonstrates where the sub-Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the sub-Fund.

INVESTMENT OBJECTIVE AND POLICY

The investment philosophy of the Castlefield UK Smaller Companies Fund is to invest in well managed UK smaller companies that are financially sound, have a distinct and sustainable competitive advantage and are capable of long term growth. The investment process involves a thorough appraisal of a Company's management, a detailed financial review and an assessment of its market position and the competitive environment. We also look to invest in companies that can demonstrate a high level of employee engagement and where employees are encouraged to become shareholders.

INVESTMENT REVIEW

PERFORMANCE

For the period from 1st March to 31st August 2017, the Castlefield UK Smaller Companies Fund, as measured by the Institutional Income units, recorded a total return of 18.1%, compared to a total return from the IA UK Smaller Companies sector average of 13.2%.

MARKET REVIEW

Stock markets seem understandably uncertain at present, given the confluence of expensive valuations (in the US at least), geopolitical concerns around North Korean missile tests and the lack of direction over the UK's exit from the EU. Whilst the Article 50 notification has been given, and negotiations have begun, they have yielded little so far. This, partly due to the surprise general election called by Theresa May and fallout that ensued, dominating much of the period. The Prime Minister rolled the dice, apparently seeking a clear mandate for the negotiations to withdraw from the European Union. As we now know however the gamble backfired and instead of a landslide victory she was left with a minority government. The shock result left analysts scrambling to decipher what this meant for markets, whilst the contrast with the sweeping victory for new French President Emmanuel Macron could not have been clearer. One thing we do know however is that inflation in the UK continues to pick up and it is now materially above the levels of wage growth, signalling an income squeeze.

UK smaller companies however have seemingly shrugged off this backdrop of enduring political uncertainty and performed well both in absolute and relative terms. The Numis Smaller Companies Index (excluding Investment Companies) in total return terms rose by 10.3%, outperforming larger capitalisation companies and the wider market.

PORTFOLIO ACTIVITY

There was a significant amount of activity within the Fund over the period as we crystallised gains from some of the Fund's stronger performers, such as IQE and Fevertree, and reduced exposure to resource related sectors, given our caution here. We also exited a couple of smaller, non-core positions, as well as the holding in Waterman Group following an approach by Japanese consulting engineer CTI at a c.80% premium to the prevailing share price.

Proceeds from these sales were redeployed into a combination of current core holdings and several new holdings, with detail on the latter as follows. PTSG is a niche service provider to markets focused on safety at height and/or characterised by being highly regulated in nature. Iomart Group is a leading provider of secure managed hosting and cloud services. Keywords Studios is an outsourced technical services provider to the global video games industry which has been growing very strongly. The Gym Group is a fast-growing budget gym club chain in the UK, focusing purely on affordability and flexibility. Two of the remaining new holdings were by way of newcomers to the AIM market. The first being Strix Group, a global leader in the design, manufacture and supply of kettle safety controls, whilst the second, Gordon Dadds, is an acquisitive law firm in the highly fragmented UK legal services market. The final significant holding introduced to the Fund was in a more established listed company, Alumasc Group. Having floated in 1986, Alumasc has a long-standing heritage of excellence in the manufacture and supply of a variety of products. It is now however a focused supplier of building products to niche markets, with a focus on the management of scarce resources, such as water and energy, in the built environment. Finally, a smaller position was initiated in leading renewable energy supplier, Good Energy.

CASTLEFIELD UK SMALLER COMPANIES FUND

OUTLOOK

Having carried out a partial reorganisation of the Fund, and with encouraging news flow from most of the companies held in the portfolio, we believe that the portfolio is well placed for the coming months. While the recent exceptional performance from smaller companies is unlikely to be repeated in the short term, the UK economy still appears to be making reasonable steps despite challenging headwinds, which we also believe provides a solid background for the continued progress of the Fund. Against such a background UK Small Companies' performance will continue to be heavily influenced by the direction of the UK stockmarket as a whole. However recent news from most of the companies held in the portfolio has been reassuring. The UK economy continues to make progress against challenging headwinds and we believe that the portfolio is well placed to make further progress in coming months.

NOTES TO THE FINANCIAL STATEMENTS

1. ACCOUNTING POLICIES

The interim financial statements have been prepared under the historical cost convention, as modified by the revaluation of investments and in accordance with the Statement of Recommended Practice "Financial Statements of Authorised Funds", issued by The Investment Association in May 2014, the Financial Conduct Authority's Collective Investment Schemes Sourcebook and the Instrument of Incorporation.

DISTRIBUTION TABLES

Expenses exceeded revenue during the period, as a result no distributions were paid (2016:same).
