

CFP Castlefield Real Return Fund

FACTSHEET - 31 MAY 2023

THE THOUGHTFUL INVESTOR

INVESTMENT AIM:

The Fund aims to generate a positive annualised real return over a rolling 3 year basis. However, there is no guarantee that this objective will be achieved over that specific, or any, time period and there is always a risk of loss to your original capital.

Real return is measured as being greater than UK Consumer Pricing Index measure of inflation, over a rolling 3 year time horizon.

For more information about the fund's detailed investment objective and policy, contained in the Key Investment Information Document, [click here](#).

WHY INVEST?

We offer values-based investing from the perspective of being a values based manager. This includes active engagement and stewardship of each investee company on performance and environmental, social and governance (ESG) considerations - aligned to our own values. That's why we're known as 'the thoughtful investor'.

Tool of diversification: Access to a diversified portfolio of multiple asset classes and different market strategies towards the overall investment objective.

Reducing volatility of investment return: Seeking to minimise the magnitude of potential losses and downside risk relative to equity markets.

Protecting purchasing power of investor capital: Seeking to provide investors with a return of capital above inflation.

RISK WARNINGS

The CFP Castlefield Real Return Fund invests in different asset classes in seeking to achieve its objective, this exposes investors to the below risks;

Structured Investments: these investments are usually linked to the performance of an underlying index or group of assets and may, if certain criteria are met, experience a swift change in value.

Credit risk: A decline in the financial health of an issuer could cause the value of its bonds to fall or become worthless.

Interest rate risk: A rise in interest rates generally causes bond prices to fall.

Liquidity risk: during difficult market conditions some securities, such as structured investments, corporate bonds and positions in emerging markets, may become more difficult to sell at a desired price.

Shares in all Funds should generally be regarded as long term investments. For more information regarding the risks associated with investing in a fund please see the Prospectus.
